PROJECTS

Act-to-do - Task Management App :

Tools Used: React.js, MongoDB, CSS

- Developed a user-friendly to-do list application implementing "Act, Track, and Done" principles.
- Used React for dynamic component-based UI and MongoDB to store user data securely.

Weather App:

Tools used: React.js, OpenWeather API, CSS, HTML

- Built a weather forecasting app using React to fetch data from the OpenWeather API.
- Implemented location-based weather updates and interactive features for an engaging user experience.

Login Page:

Tools used: React.js, Node.js, Express.js, MongoDB, CSS, HTML

- Created a secure login system with backend validation using Node.js and Express.
- Integrated user authentication, session management, and password encryption for data safety.

Bulk-Mail Application

Tools Used: React.js, MongoDB, CSS, HTML

- Designed a bulk email sender app that connects with MongoDB for efficient message management.
- Enabled functionalities for sending, managing, and tracking emails with an interactive interface.

Certification: MERN Stack Development at Error Makes
CleverAcademy

SKILLS
